Two-Row Ten-Frame Count

Suggested setup: ages 4-5. Adjust to the child; not a milestone.

Use pages 1-2 as number models. Draw one mark in each chosen box on this large mat. Begin at the top left, finish that row, then continue below. The small Build it frames are for small drawn marks, not wide counters. Keep pages whole when loose pieces are unsuitable.

Fill five across the top, then continue on the bottom row.

Family prompts

An empty whole frame shows zero. Empty boxes are not counted as objects.

Start with three marks. Add four more to make seven: five on top and two below.

Then add three to reach ten. Use a fresh frame for another amount.

For eight, point to the two empty boxes before adding the last two marks.

Print on US Letter (8.5 x 11 in) at actual size for 100-point boxes, about 1.39 inches across. The larger layout is a work space, not a safety test for counters. Use whole crayons with adult help, or point while an adult draws. No beans, coins, pom-poms, or egg packaging are required.
