Stacking Challenge With One Rule

Ages 5-6 | Print at actual size · US Letter · use the whole page; point to one rule at a time

Parent guide: Read one rule, count the pieces into a group, and put extras away. Try a tower, test that it stands with hands off, then change only one thing after a fall. Rule 2 uses the short printed bar, not the width of this sheet.

Rule card 1

Use only SIX pieces. Build the tallest tower that still stands when you take your hands away.

Rule card 2

Use only FOUR pieces. The base may be only as wide as the printed bar.

2 inches / about 5 cm at actual size

Rule card 3

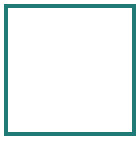
Use three cups and three blocks. The tower must stand for a slow count of five.

Rule card 4

The tower may be no taller than a book you choose. Use as many pieces as you like under that height.

Rule card 5

Build a tower that can hold an adult-prepared paper square (this size) on top without falling. Collect the square when you finish.



this size

Rule card 6

Family rule: _____

Pieces we may use this time: 1 2 3 4 5 6 7 8 Circle the number, and put the rest out of reach.
